HARPREET KHEHRA

AI Developer | Slough, UK | British Citizen | github.com/Preeti7101981

SUMMARY

Results-driven telecommunications professional with over 7.5 years of experience at VMO2 (Virgin Media O2) in access ordering, provisioning coordination and supplier management, now building and deploying AI applications. Proven ability to manage end-to-end order lifecycles, maintain accurate and compliant records, and optimise costs through effective vendor oversight. Known for exceptional organisational skills, meticulous attention to detail and strong collaboration with cross-functional stakeholders. Committed to driving process improvements that enhance operational efficiency and service quality.

CERTIFICATIONS

AI-900: Microsoft Azure AI Fundamentals
Microsoft Certified

ISTQB Foundation Level
International Software Testing Qualifications Board

SKILLS

AI / Technical: Python • PyTorch • Hugging Face Transformers • Flask • Gradio • Computer Vision (ResNet50, CNNs) • NLP (T5, transformers) • Cosine Similarity • Model Fine-Tuning and Evaluation • Git/GitHub

Professional: Access Provisioning • Access Ordering • Order Management • Cease Management • Supplier Relationship Management • Data Analysis • Data Quality • Reporting • Process Improvement • Cost Control • SLA Management • Escalation Handling • IT Support • OSS Case Management • Stakeholder Communication • Cross-functional Coordination • System Development • Automation Support

Tools: MaGnet Lines • OSS • SharePoint • MS Excel (VLOOKUP, formulas, pivot tables, validation and formatting) • Outlook • Teams

AI PROJECTS

Radiology Report Summariser — Python, PyTorch, Hugging Face Transformers, Gradio

- Built an end-to-end NLP pipeline that fine-tunes a T5 (text-to-text transformer) model to generate radiology “impressions” from clinical “findings”, automating a manual clinical summarisation task.
- Processed ~3,900 de-identified XML reports into a clean dataset of ~3,400 records; engineered a reproducible two-step pipeline (XML to CSV extraction, then fine-tuning and evaluation).
- Evaluated model quality using the ROUGE metric (ROUGE-1 approx. 0.39) and deployed an interactive Gradio web UI for live demonstrations.
- Delivered a fully version-controlled, documented GitHub repository with a reproducibility runbook; ensured no PHI or sensitive data was ever committed.

Visual Product Recommendation App — Python, PyTorch, torchvision, Flask

- Developed an unsupervised image recommendation system for a fashion retailer: users upload a clothing image and receive visually similar products from the catalogue.
- Used a pre-trained ResNet50 CNN as a feature extractor to generate image embeddings, ranking recommendations by cosine similarity (typical scores above 0.7).
- Performed data cleaning (removal of invalid and duplicate images) and built an image transformation pipeline for consistent model input.
- Deployed the final model as a live, publicly accessible Flask web app, displaying the top 5 similar items with their cosine similarity scores.

PROFESSIONAL EXPERIENCE

Provisioning Coordinator — VMO2, Reading | Jan 2018 – Oct 2025

- Managed supplier delivery reports from BT, Virgin Media and others, updating MaGnet Lines with accurate order statuses, routing and completion details.
- Maintained and updated SharePoint trackers for customer and supplier visibility.

- Oversaw group mailbox operations, ensuring timely vendor responses within SLA.
- Tracked and managed open and missing orders, preparing detailed weekly status reports.
- Raised and managed OSS cases, ensuring resolution within target timescales.
- Led weekly calls with BT to review and update delivery progress.
- Coordinated site surveys (CF903 forms), confirming supplier assignments and scheduling visits.
- Supported small cell provisioning (London projects), MW ordering and box swap routing.
- Liaised between internal teams and suppliers to mitigate risks and ensure timely project completion.
- Played an integral role in reducing the open orders backlog and improving supplier reporting quality.
- Supported automation initiatives that reduced manual reporting dependency.
- Played a key role in supporting MW and Special Event projects requiring bespoke fibre ordering.
- Managed the cessation of 300+ legacy lines (fibre/ADSL/PSTN/Ethernet), supporting OPEX reduction initiatives.
- Proactively engaged with internal and supplier teams to improve reporting quality and operational efficiency.
- Influenced system improvements, including SBH/SRN ordering and MaGnet enhancements, reducing future support cases.

EDUCATION

Bachelor's Degree in Computer Science
